

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 7, between lines 18-23 of the specification with the following:

In addition to the key phrases mentioned above, information containing meta data can be processed into the input document. Such meta data may be contained in the data portion of the document or be generated by separate processing steps. For example, when the ~~test~~text portion is built up from an audio data file, in addition to known techniques of speech recognition, also the equally known techniques of speaker identification may be used to detect, for example, constant changes of speaker, which point to an interview.
